

## ELECTRIC SAJ COOKER

### ESC - 56

- Dimensions: 600 (W) x 640 (D) x 220 (H) mm
- Operating Voltage:
  - 220 Volts / 1 Phase / 50 – 60 Cycles.
  - Power: 2400 Watts
- Capacity: 60 manaish per hour of diameter 25 cm

### ESC - 70

- Dimensions: 720(W) x 760 (D) x 220 (H) mm
- Operating Voltage:
  - 380 Volts / 3 Phase / 50 – 60 Cycles.
  - Power: 3600 Watts
- Capacity: 90 manaish per hour of diameter 25 cm

## HEATING SYSTEM:

LEON Saj cooker's heating system:

The heating elements installed on the saj cookers are specially designed and equally distributed on the entire surface of the dome.

The result is uniform heating of the dome, with no variations on the entire cooking surface

## MAIN FEATURES AND SPECIFICATIONS:

- Base construction in high quality stainless steel type AISI 304, 18/10.
- Top dome made of steel, thickness 5mm.
- Thermostatically controlled system with maximum temperature up to +300°C.
- Thermostat, thermometer, main switch & heating elements of German origin.
- Wiring - Silicon based heat resistant wires.
- Integrated waste hole chute with drawer for easy cleaning of dome.

Design & specifications are subject to change without prior notice.
